

**Description:** We are the leading manufacturers of Flexible Roller Conveyor in Bangladesh. Our range of products including flexible roller conveyor, powered roller conveyor, bend roller conveyor and gravity roller conveyor. Roller Conveyor are easy to install, low maintenance rollers are built to help worker in loading and unloading of material efficiently. Roller conveyors are good in transporting a wide variety of crates, boxes and pallets on loading docks, baggage handling, packaging, or on assembly lines and many other Application. Roller Conveyors are an economical solution for material handling. Portable, expandable conveyors allow you to quickly create a temporary conveyor line where you require it. Just extend and curve the conveyor to meet your needs.

#### Benefits:

- Cost effectiveness in terms of power use (no actual power supply is needed)
- They are very easy to install and are reliable, only requiring minimal maintenance
- They are modular in design, meaning they are very flexible and can be utilised in many ways
- They can be linked to the end of a powered system where packing or accumulation is required
- Roller straights are the building blocks of these systems, but curved roller units, personnel gates and spurs can also be added easily.

Our **Flexible Conveyors** provide low cost flexible conveying. We are involved in offering an extensive range of Flexible Conveyors. Widely used in packing lines and warehouses. Our conveyors provide flexible conveying solutions for creating bend and curved temporary conveying paths.

#### Application:

- Convey loads of Cartons, Totes, Fixtures, Cardboard Boxes
- Non-Contact Accumulation
- Unitized
- Pallet loads when bottom boards are perpendicular to the rollers
- Pallet loads when bottom boards are parallel to the rollers
- Side loading/unloading
- Accumulation of loads
