

EGG Packaging System Solution

Overlay Labeling Machine for Egg Packages with Thermal printer

Simultaneous labeling and checking More accurate and easy to use chicken egg GP line compatible system.

Shinmei first sold to the egg industry in 1987. Since then, check printers and labelers have been introduced at many GP centers, including check stampers. Those machines print out dates like expiration date, which is essential for food products. In the recent food industry, the “display” such as the expiration date is required as an important thing for consumers and buyers. Shinmei continues to contribute to the egg industry.

■ Equipped with rich check function

The purpose may be just to put a label on the egg pack, but we have added values in our products. It has been made by Shinmei's long-standing commitment to the chicken and egg industry.

There are convenient functions such as date print image check device, ball drop and content check function, repack product check function, pack identification device and so on.

content check function, repack product check function, pack identification device and so on.

We have a deep knowledge about the industry and have equipped various check functions with the standard machine.
